

IV. CONCLUSION

Based on the results of the research, the conclusions obtained will answer the formulation of the problem and describe the research conducted in the form of an Analysis of the Implementation of 5G Telecommunication Services in Indonesia with a License Modality of 3.3 GHz Frequency and 12 MHz Bandwidth as follows: the results of the analysis according to the needs of the 5G service delivery project in Indonesia, which is obtained from the company's NPV of \$611,231,839.88 or Rp. 8877,531,242,437.56. In addition, from the results of the calculations in the table above, the results of the company's IRR are 47.15%. Then, the results of the calculations in the table above show the results of the company's Payback Period of 6.6 years. The business is declared eligible to be held.
